

Integrated Solar LED Street Lights

ÉNERVER
EFICIENCIA ENERGÉTICA

Integrated Solar LED Street Lights with "ALL-IN-ONE" technology, which integrates a highly efficient solar panel, super bright LED, compact LiFePO4 lithium battery, motion sensor and a smart power management system into a cabinet to achieve features such as easy to install, long lifespan and environmental friendly.

Features and Benefits

ALL-IN-ONE solar light is the most convenient design for transportation, installation and maintenance.

Fully recyclable LiFePO4 batteries are half weight and size of lead acid and offering as much as 10 times the cycle life.

Bracket and security bolts protect the light from steal and violence damage.

BRIDGELUX latest and highest performance LED to achieve 110lm/W @85°C.

A built-in PIR sensor regulates the light output between full brightness and DIM mode depending upon the detection of movement for saving energy.

The manufacturer has certificated ISO9000/ISO14000 and products passed CE, ROHS, IP65, loading test, etc.

BRIDGELUX LED

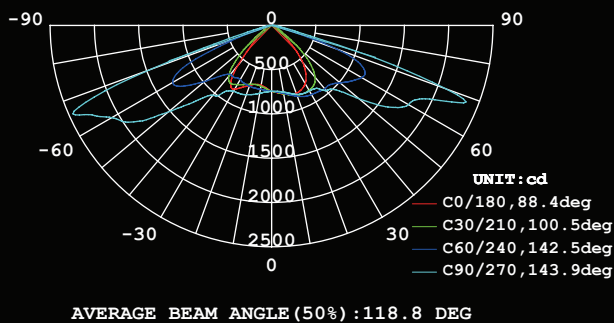

Adopted BRIDGELUX LED with average light illumination of 110lm @350mA, 85°C.

Bat wing light distribution

Leadsun new design light distribution lens widely improve illumination effect.

Compared with the last generation product, illumination area enlarge **40%** more, and illumination uniformity does improve up to **200%**.

Bat wing light distribution curve

Light intensity diagram

Motion detection

Integrated Solar LED Street Lights comes complete with built-in motion detection system that automatically regular the light soure from full bright (100%) to the energy saving output (30%) to increase battery autonomy.

Infrared motion sensor detection area

APP Control

Control the light

Turn ON or turn OFF the light and change light intensity in the range of 10% to 100%.

Track historical data

Review monthly report to track every day's power generation, inner temperature and detail records for charging and discharge.

Set custom working mode

Users can set their own working mode according to the local solar irradiance or peak sun hours and other lighting requirement.

Real-time supervision

Monitor the status of main components and real time charging / discharging data.

Assembling and Installation

Step 1: Open the box and prepare all the parts you need.

Step 2: Unscrewing the screw of the light fixture/box for installing bracket.

Step 3: Screw and hold one end of the mounting support tube to the light fixture/box.

Step 4: Connect the pole mount bracket with the support tube.

Step 5: Insert the fuse into the light fixture/box. Unfold the knob of fuse (see below) and take out the insulating film of the fuse socket. Make sure the fuse is working, then tighten.

Step 6: Mount the light fixture/box on the pole.
